FUNDING SUPPORT / PRACTICAL TOOLKIT

Funding Evidence

A stronger story, grounded in evidence.

Organise the need, programme logic and evidence behind a funding proposal. Make every important statement traceable and every limitation visible.

01

Find

Gather relevant local evidence and your own service records.

02

Connect

Link each claim to a source and the programme’s purpose.

03

Qualify

Review wording, limitations, permissions and currency.

A practical bundle for small teams

Visual guide + editable Excel workbook + adaptable documents + fictional worked examples.

CUSTOMISABLE ADMINISTRATION TOOLS
Adapt to your organisation and each funder’s actual requirements. No funding guarantee, automatic reminders or direct data submission.

See what the numbers really say.

All names, amounts and results on this page and in the example CSV files are invented for learning. They are not client results.

Recorded programme reach	**24 participants**
Exit questionnaires	**15 responses**
Reported useful skills	**11 of 15 respondents**
Coverage	**62.5% (15 / 24)**
Qualified claim	**11 of 15 respondents**

A careful claim is: Eleven of 15 exit respondents said they gained useful skills. Nine participants did not respond. This is self-reported experience; it does not prove lasting skill improvement for all participants.

Try it in the workbook

Create E01 in Evidence and link C01 in Claims. A matching ID only checks the link. A reviewer still checks relevance, missing information, permissions and the final wording.
